1. Introduction & System Overview

InnoPV User Manual

What is InnoPV?

InnoPV is a web-based Pharmacovigilance (PV) Case Management System designed to manage the complete lifecycle of adverse event cases from initial intake to regulatory submission and closure. It supports ICH E2B reporting standards and provides structured workflows for multi-user, multi-role environments.

Key Capabilities

- Centralized case intake and data entry for adverse events
- Structured multi-level workflow: PV Associate !' PV Manager !' Medical Reviewer
- Automated validity & seriousness assessment with due-date calculation
- Duplicate case detection and resolution
- Role-based checklists for quality assurance at every stage
- Follow-up management for additional case information
- Regulatory submission tracking (E2B, MedWatch, CIOMS, etc.)
- Complete case reports in PDF, Word, and Excel formats
- SLA (Service Level Agreement) monitoring and email alerts
- Full audit trail and case history for compliance
- Admin panel for user, master data, and checklist management

Technology & Access

Platform	Web-based (browser accessible) – no installation required
Supported Browsers	Chrome, Edge, Firefox (latest versions recommended)
Authentication	Email + Password with account lockout protection
Session	Cookie-based session with "Remember Me" option
Data Security	Role-based access control (RBAC), CSRF protection, audit trails

2. User Roles & Access Rights

InnoPV User Manual

Overview of Roles

InnoPV has four predefined roles. Each user is assigned exactly one role.

Admin Role

System administrator with full access. Manages users, master data, checklists, and has visibility over all cases.

Can Do:

- Full access to all modules and all cases
- Create, edit, activate/deactivate users
- Assign any role to users
- Manage master data (products, studies, sponsors, common options)
- Manage checklists (create/edit/version)
- View admin dashboard with system-wide statistics
- Assign cases to any role or user
- Access all reports and export data
- Trigger SLA alerts

PV Associate Role

Primary data entry user. Creates new cases, enters all case data sections, and progresses cases through initial workflow stages.

Can Do:

- Create new PV cases (intake form)
- View and manage own created cases + cases assigned to them
- Enter all case data: patient, reporter, product, adverse event, lab details, attachments, concomitant medications
- Perform duplicate check
- Complete PV Associate checklist
- Submit case to PV Manager
- Add and process follow-ups
- View case history and audit trail
- Download complete case report (PDF/Word/Excel)

Restrictions:

- Cannot assign cases to other users
- Cannot access Admin panel, master data, or user management
- Cannot access regulatory submission module
- Cannot trigger SLA alerts
- Cannot view Admin or PV Manager dashboard

PV Manager Role

Supervises case quality. Reviews submitted cases, assigns to Medical Reviewer or returns to PV Associate, manages regulatory submissions.

Can Do:

- View all cases in PV Manager inbox
- Review case data and assign checklist
- Forward case to Medical Reviewer
- Return case to PV Associate with comments
- Manage case assignment (assign cases to users)
- Manage regulatory submissions

- View SLA alerts and send email notifications
- Access case reports and CSV export
- Access regulatory submission report
- View PV Manager dashboard
- Initiate case closure validation

Restrictions:

- Cannot create new cases (intake)
- Cannot access Admin panel, master data, or user management
- Cannot manage checklists

Medical Reviewer Role

Performs medical review of cases forwarded by PV Manager. Approves or returns cases.

Can Do:

- View cases in Medical Reviewer inbox
- Review full case data (read access to all sections)
- Complete Medical Reviewer checklist
- Medically approve a case
- Return case to PV Manager with comments
- Add follow-up entries
- Manage regulatory submissions
- View case history and audit trail
- Download complete case report
- Initiate case closure validation
- View Medical Reviewer dashboard

Restrictions:

- Cannot create new cases
- Cannot assign cases
- Cannot access Admin panel or master data
- Cannot trigger SLA alerts
- Cannot access case reports / CSV export

3. Login & Authentication

InnoPV User Manual

How to Login

- Step 1: Open InnoPV in your web browser.
- Step 2: Enter your registered Email address in the Email field.
- Step 3: Enter your Password in the Password field.
- Step 4: Optionally check "Remember Me" to stay logged in on the device.
- Step 5: Click the Login button.
- Step 6: On successful login, you will be redirected to your role-specific Dashboard.

First Login – Password Change

If you are logging in for the first time (or if Admin has reset your password), the system will prompt you to change your password immediately before accessing any other feature. You must set a new password that is different from the temporary/current password.

Security Features

Account Lockout	Account is locked after multiple consecutive failed login attempts. Contact Admin to unlock
Inactive Account	If your account is deactivated by Admin, login is blocked with a message.
Password Policy	New password must differ from current password. Complexity enforced by system policy
CSRF Protection	All forms are protected against Cross-Site Request Forgery attacks.
Session Security	Sessions are cookie-based and expire on logout or browser close (unless "Remember Me" is used)
Forgot Password	Use the "Forgot Password" link on the login page – a reset link is sent to your registered email.

Logout

Click your profile/name in the top navigation bar and select "Logout". Always log out when leaving your workstation unattended.

4. Dashboard

InnoPV User Manual

Role-Specific Dashboards

After login, each user is redirected to their role-specific dashboard. The dashboard provides a real-time snapshot of the system.

Admin Dashboard

- Total cases count, open vs closed cases
- Cases by status (bar/pie chart)
- Total users count, active users
- Users by role (chart)
- Recent 8 cases list with status and due dates
- Recent 8 users registered
- Overdue cases count with due date alerts

PV Manager Dashboard

- Cases pending PV Manager review
- Cases forwarded to Medical Reviewer
- Overdue cases and SLA status
- Monthly case trend charts
- Cases by seriousness (Serious / Non-Serious)
- Cases by validity (Valid / Invalid)

PV Associate Dashboard

- Cases assigned to me
- My cases by status
- Draft cases pending completion
- Cases due in next 7 days
- Returned cases requiring action

Medical Reviewer Dashboard

- Cases pending medical review
- Medically approved cases
- Cases returned to PV Manager
- Review pending SLA status

PV Analytics Dashboard

All roles can access the PV Analytics Dashboard (/PvDashboard/Index) which shows system-wide analytics including: total/open/closed cases, serious vs non-serious breakdown, valid vs invalid counts, overdue cases, due-soon cases (next 7 days), monthly case receipt trend (last 12 months), and cases by assigned role.

5. Case Inbox

InnoPV User Manual

What is the Case Inbox?

The Case Inbox is your personalized list of cases that require your attention. It shows only the cases relevant to your role and current assignment. Navigate to Case Inbox from the top navigation.

Inbox Filters by Role

Admin	Sees ALL cases in the system (no filter applied)
PV Associate	Draft, DataEntryInProgress, ValidityPending, InvalidFollowUpRequired, DuplicateCheckPending, PvAssociateChecklistPending, ReturnedByPvManager
PV Manager	SubmittedToPvManager, PvManagerReviewPending, PvManagerChecklistPending, ResubmittedToPvManager
Medical Reviewer	ForwardedToMedicalReviewer, MedicalReviewPending, MedicalReviewerChecklistPending, MedicallyApproved

Inbox Columns

Case No	Unique auto-generated case identifier
Source	Source of the adverse event report
Receipt Date	Date the case was received
Reporter	Initial reporter name
Patient ID	Patient identifier
Product	Suspect product name
Event	Adverse event term
Valid	Whether the case meets validity criteria (Yes/No)
Serious	Whether the event is serious (Yes/No)
Due Date	Case processing deadline (highlighted if overdue)
Status	Current workflow status
Actions	Links to open case, enter data, workflow, history

6. PV Case Management

InnoPV User Manual

Creating a New Case (Intake)

Only Admin and PV Associate can create new cases. Navigate to PV Cases !' New Case.

Case Source	Source of the report (e.g., Spontaneous, Clinical Trial, Literature)
Receipt Date	Date case was received. Cannot be a future date.
Initial Reporter Name	Name of the person/entity reporting the event
Patient Identifier	Anonymized patient identifier
Suspect Product Name	Name of the product suspected to cause the event
Adverse Event Term	Medical term describing the adverse event
Is Patient Identifiable?	Yes/No – one of 4 validity criteria
Is Reporter Identifiable?	Yes/No – one of 4 validity criteria
Suspect Product Available?	Yes/No – one of 4 validity criteria
Adverse Event Available?	Yes/No – one of 4 validity criteria
Is Serious?	Yes/No – determines due date (7 days if Serious, 15 days if Non-Serious)
Narrative	Free-text description of the case

Case Validity & Due Date Calculation

A case is automatically determined as Valid if ALL four criteria are met: Patient Identifiable AND Reporter Identifiable AND Suspect Product Available AND Adverse Event Available. If any criterion is missing, the case is set to "Invalid – Follow-Up Required" status.

Due Date: Serious cases = Receipt Date + 7 calendar days. Non-Serious cases = Receipt Date + 15 calendar days.

Case List (PV Cases)

Admins see all cases. PV Associates see only cases they created or cases assigned to them. Cases are sorted by most recent first. Click on a Case No to open the case detail.

7. Case Data Entry (Detailed)

InnoPV User Manual

Overview

After creating a case, detailed data is entered across multiple sections. All roles (Admin, PV Associate, PV Manager, Medical Reviewer) can view case data. Edit is restricted based on case status – closed/finalized/submitted/duplicate/invalid cases are read-only.

7.1 Patient Details

- Patient Initials, Patient Identifier, Date of Birth, Age (value + unit)
- Gender, Weight (kg), Height (cm)
- Is Pregnant (Yes/No + remarks)
- Relevant Medical History, Allergy History, Other Patient Information

7.2 Reporter Details

- Reporter Name, Reporter Type (Doctor, Nurse, Pharmacist, Consumer, etc.)
- Organization, Address, City, State, Country, Postal Code
- Phone, Email, Fax
- Is Reporter the Prescriber? (Yes/No)

7.3 Suspect Product Details (1 or more)

- Product Name (linked to Product Master), Batch No, Expiry Date
- Indication, Route of Administration, Dose, Dose Unit, Frequency
- Start Date, Stop Date, Duration
- Action Taken (Drug Withdrawn, Dose Reduced, etc.)
- Rechallenge / De-challenge information

7.4 Adverse Event Details (1 or more)

- Event Term (MedDRA term), Event Description
- Onset Date, Resolution Date, Duration
- Outcome (Recovered, Fatal, Not Recovered, Unknown, etc.)
- Seriousness criteria (Life Threatening, Hospitalization, Death, Congenital Anomaly, etc.)
- Causality Assessment, Severity

7.5 Concomitant Medications (optional)

- Drug Name, Indication, Dose, Route, Frequency
- Start Date, Stop Date

7.6 Lab Details (optional)

- Test Name, Test Date, Result Value, Unit, Normal Range
- Interpretation (Normal / Abnormal)

7.7 Attachments

- Upload supporting documents (medical records, forms, etc.)
- File type, original filename, uploaded by and date are recorded
- Files are stored securely on the server

8. Case Workflow & Actions

InnoPV User Manual

Complete Case Workflow

Step 1 – Intake

[PV Associate / Admin]

Create case via intake form. System auto-assigns Case No, sets validity, calculates due date. Status = DataEntryInProgress (valid) or InvalidFollowUpRequired.

Step 2 – Data Entry

[PV Associate / Admin]

Complete all data sections: Patient, Reporter, Product, Adverse Event, Concomitant Meds, Lab, Attachments. Status remains DataEntryInProgress.

Step 3 – Duplicate Check

[PV Associate / Admin]

System searches for potential duplicate cases based on patient, product, event. Associate reviews and either clears or marks as duplicate. Status = DuplicateCheckPending.

Step 4 – PV Associate Checklist

[PV Associate]

Complete the role-specific quality checklist. All mandatory items must be checked. Status = PvAssociateChecklistPending.

Step 5 – Submit to PV Manager

[PV Associate]

Once checklist is complete, case is submitted to PV Manager. Status = SubmittedToPvManager. Email notification sent to PV Managers.

Step 6 – PV Manager Review

[PV Manager / Admin]

PV Manager reviews case data. Can: (a) Forward to Medical Reviewer, or (b) Return to PV Associate with comments.

Step 7 – PV Manager Checklist

[PV Manager]

PV Manager completes their quality checklist. Status = PvManagerChecklistPending.

Step 8 – Forward to Medical Reviewer

[PV Manager / Admin]

After checklist, case is forwarded for medical review. Status = ForwardedToMedicalReviewer.

Step 9 – Medical Review

[Medical Reviewer]

Medical Reviewer reviews full case. Completes Medical Reviewer checklist. Status = MedicalReviewPending / MedicalReviewerChecklistPending.

Step 10 – Medical Approval / Return

[Medical Reviewer]

Medical Reviewer either: (a) Approves case medically !' Status = MedicallyApproved, or (b) Returns to PV Manager with comments !' Status = ReturnedByMedicalReviewer.

Step 11 – Case Finalization

[PV Manager / Admin]

After medical approval, case is finalized. Status = CaseFinalized.

Step 12 – Regulatory Submission

[PV Manager / Admin / Medical Reviewer]

Create submission record(s) for regulatory authority. Track submission status: Pending !' Submitted !' Acknowledgement Received. Status = Submitted.

Step 13 – Case Closure

[Admin / PV Manager]

After all submissions are complete, validate closure criteria and close the case. Status = CaseClosed.

9. Checklist Capture

InnoPV User Manual

Purpose of Checklists

Checklists are quality assurance tools that ensure all required steps are completed before a case progresses to the next stage. Different checklists apply to different roles and stages. Checklists are configurable by Admin.

How to Complete a Checklist

- Step 1: Open the case from your Case Inbox.
- Step 2: Click "Checklist" from the case action menu.
- Step 3: The system loads the appropriate checklist for your role and current stage.
- Step 4: Read each checklist item carefully.
- Step 5: Check the checkbox next to each item when you have verified it.
- Step 6: Add remarks in the Remarks field if needed.
- Step 7: Mandatory items (marked with *) MUST be checked before you can proceed.
- Step 8: Click "Save & Submit" to save your checklist responses and advance the workflow.

Checklist Types

PV Associate Checklist	PV Associate	Case data completeness and quality check before submission to PV Manager
PV Manager Checklist	PV Manager	Review quality and regulatory compliance before forwarding to Medical Reviewer
Medical Reviewer Checklist	Medical Reviewer	Medical accuracy and approval criteria verification

Checklist Versioning

Admin can create new versions of checklists (with EffectiveFrom date). The system always uses the latest active checklist for each role/stage combination. Checklist responses are permanently saved per case per version for audit purposes.

10. Case Follow-Up Management

InnoPV User Manual

What is a Follow-Up?

A follow-up is additional information received for an existing case after initial intake. This could be updated patient status, new lab results, reporter clarifications, etc. Follow-ups are tracked separately and can update the validity status of a case.

Adding a Follow-Up

- Step 1: Open the case from Case Inbox.
- Step 2: Click "Follow-Up" from the case action menu.
- Step 3: On the Follow-Up list, click "Add Follow-Up".
- Step 4: Enter: Receipt Date, Source, Received From, Description, Additional Information.
- Step 5: Click Save. A follow-up number (FU-001, FU-002, etc.) is auto-assigned.
- Step 6: Follow-ups cannot be added to duplicate or invalid cases.

Processing a Follow-Up

Once a follow-up is reviewed and the case data is updated accordingly, mark the follow-up as "Processed" with remarks. This keeps the follow-up log clean and auditable.

Follow-Up Fields

Follow-Up No	Auto-generated sequential number (FU-001, FU-002...)
Receipt Date	Date additional information was received
Source	Where the information came from
Received From	Name/entity that provided the information
Description	Summary of the follow-up information
Additional Information	Detailed notes
Is Processed	Whether the case data has been updated based on this follow-up
Processed Remarks	Notes on what changes were made to the case

11. Duplicate Check

InnoPV User Manual

Purpose

The Duplicate Check module prevents multiple records being created for the same adverse event case. The system automatically finds potential duplicates based on matching patient identifiers, suspect products, and adverse event terms.

How to Perform a Duplicate Check

- Step 1: Open the case and click "Duplicate Check" from the action menu.
- Step 2: The system displays a list of potential duplicate cases based on matching criteria.
- Step 3: Review each candidate case by clicking its Case No to open it.
- Step 4: If a duplicate is found: select the duplicate case, enter remarks, and click "Mark as Duplicate".
- Step 5: The current case is set to status "MarkedAsDuplicate" and a link is created to the original case.
- Step 6: If no duplicate found: click "No Duplicate Found – Continue" to proceed.

Duplicate Matching Criteria

The system checks cases with the same: patient identifier AND suspect product name AND adverse event term. Cases that are already marked as duplicate, invalid, or closed are excluded from candidates.

Access

Available to: Admin, PV Associate, PV Manager. Medical Reviewer does not perform duplicate checks.

12–13. Case History, Audit Trail & Complete Report

Product User Manual

12. Case History & Audit Trail

All roles can view the complete history of any case they have access to. Navigate to Case Inbox !' Open Case !' History.

Workflow Comments

Every action (submit, return, forward, approve) generates a comment record showing: action type, from role, to role, comment text, performed by, timestamp.

Audit Trail

The system records every change to every field in the case. Each audit trail entry shows: entity modified, field name, old value, new value, performed by user, timestamp. This provides a complete 21 CFR Part 11 compliant audit trail.

13. Case Complete Report (PDF / Word / Excel)

All roles can generate a complete case report that includes all sections of a case in one document. Navigate to Case Inbox !' Open Case !' Complete Report.

PDF Export	Generates a comprehensive formatted PDF report of the entire case suitable for printing or archiving
Word (DOCX)	Generates a Microsoft Word document for further editing or submission preparation
Excel (XLSX)	Generates a structured Excel file with all case data in tabular format for analysis

Case Complete Report – Index View

The Report Index page allows filtering cases by status, seriousness, date range, product, and event. You can view summary statistics (Total, Serious, Non-Serious, Valid, Invalid, Closed) and then select individual cases to export their complete report.

14. Regulatory Submission Management

InnoPV User Manual

Overview

After a case is medically approved and finalized, regulatory submissions must be created and tracked.
Access: Admin, PV Manager, Medical Reviewer.

Creating a Regulatory Submission

Submission Type	E.g., 15-Day Expedited, Periodic, Annual Safety Report
Recipient Authority	Regulatory body (e.g., CDSCO, FDA, EMA, WHO)
Submission Format	E.g., E2B (XML), MedWatch, CIOMS, NCA Form
Due Date	Submission deadline based on regulatory requirements
Submission Status	SubmissionPending !' Submitted !' AcknowledgementPending !' AcknowledgementReceived
Submitted Date	Actual date submission was sent
Acknowledgement Date	Date regulatory body acknowledged receipt
Reference No	Acknowledgement reference number from authority
Remarks	Additional notes on the submission
File Attachment	Upload the submission document (E2B XML, PDF, etc.)

Submission Status Flow

- SubmissionPending !' Initial state when submission record is created
- Submitted !' Submission has been sent to regulatory authority
- AcknowledgementPending !' Awaiting acknowledgement from authority
- AcknowledgementReceived !' Authority has acknowledged the submission
- Rejected !' Submission was rejected; requires resubmission
- Cancelled !' Submission was cancelled (case may be invalid/duplicate)

Overdue Submissions

Submissions are automatically flagged as "Overdue" when the Due Date has passed and the status is still SubmissionPending or AcknowledgementPending. Overdue count is visible on the submission index page.

15. Reports & Analytics

InnoPV User Manual

Case Report (Access: Admin + PV Manager)

Provides a filterable list of all cases with summary statistics. Navigate to Reports !' Case Report.

Filter Options

- Date range (Receipt Date from – to)
- Case status
- Is Serious (Yes/No)
- Is Valid (Yes/No)
- Product name
- Event term

Summary Statistics

Total Count, Valid Count, Invalid Count, Serious Count, Non-Serious Count, Closed Count, Overdue Count.

Export to CSV

Click "Export CSV" to download all filtered cases in CSV format. File is named with timestamp:
PV_Case_Report_YYYYMMDD_HH:mm:ss.csv

Regulatory Submission Report (Access: Admin + PV Manager)

Provides a filterable list of all regulatory submissions. Navigate to Reports !' Submission Report.

Filter Options

- Case number, Submission type, Recipient authority
- Submission status, Date range
- Overdue only filter

Summary Statistics

Total, Pending, Submitted, Acknowledgement Pending, Acknowledgement Received, Overdue, Rejected, Cancelled.

Export to CSV

Click "Export CSV" to download submission report. File:
Regulatory_Submission_Report_YYYYMMDD_HH:mm:ss.csv

16. SLA Alerts

InnoPV User Manual

What are SLA Alerts?

SLA (Service Level Agreement) Alerts are automated email notifications sent to relevant users when cases are approaching their due date or have already become overdue. This ensures timely case processing and regulatory compliance.

Access

SLA Alerts module is accessible to Admin and PV Manager only. Navigate to SLA Alerts from the main menu.

Alert Types

Due Soon Alerts	Sent for cases whose due date falls within the next 3 days (configurable). <i>Reminds users to process the case before deadline</i>
Overdue Alerts	Sent for cases whose due date has already passed and the case is not yet closed. Escalation notification
All Alerts	Sends both Due Soon and Overdue alerts in a single batch operation.

How to Send Alerts

- Step 1: Navigate to SLA Alerts from the main navigation menu.
- Step 2: The page shows a preview of cases that would receive alerts (Due Soon and Overdue counts).
- Step 3: Click "Send Due Soon Alerts" to send reminders for cases nearing deadline.
- Step 4: Click "Send Overdue Alerts" to send escalation notices for overdue cases.
- Step 5: Click "Send All Alerts" to process both types in one action.
- Step 6: A success message confirms the number of cases processed and email recipients.

Email Recipients

Alert emails are sent to the currently assigned user for each case, and to PV Managers. The email includes the Case No, product, event, due date, and current status.

17. Admin – User Management

InnoPV User Manual

Overview (Admin only)

Admin can manage all system users from Admin !' User Management. This includes creating new users, editing profiles, activating/deactivating accounts, and unlocking locked accounts.

User List

Full Name	User's full name
Email	Login email address (also username)
Mobile No	Contact number
Designation	Job title/designation
Department	Department (default: PV)
Role	Assigned system role
Is Active	Whether user can log in
Must Change Password	Forced password change flag on next login
Lockout End	If locked, when lockout expires
Actions	Edit, Activate/Deactivate, Unlock, Reset Password

Creating a New User

- Step 1: Navigate to Admin !' User Management !' Create User.
- Step 2: Enter Full Name, Email, Mobile No, Designation, Department.
- Step 3: Select Role from dropdown (Admin, PV Associate, PV Manager, Medical Reviewer).
- Step 4: The system auto-generates a temporary password.
- Step 5: Check "Send Credentials by Email" to email login details to the user.
- Step 6: Click Create. User account is created with MustChangePassword = true.
- Step 7: User must change password on first login.

Editing a User

Click Edit on the user row. Admin can update: Full Name, Mobile No, Designation, Department, Role. To deactivate a user, toggle the Is Active flag – the user will be blocked from login immediately.

Unlocking an Account

If a user account is locked due to multiple failed login attempts, Admin can unlock it from User Management !' click Unlock next to the user. The lockout end date is cleared and the user can log in again.

18. Admin – Master Data Management

InnoPV User Manual

Overview (Admin only)

Master Data provides the dropdown values used throughout the application. Navigate to Admin !' Master Data. Keeping master data accurate ensures consistent data entry across cases.

Common Master Options

These are the dropdown lists used in case data entry forms:

Reporter Type	Types of reporters (e.g., Physician, Pharmacist, Nurse, Patient, Consumer, Sponsor)
Outcome	Adverse event outcomes (e.g., Recovered, Fatal, Not Recovered, Recovering, Unknown, Sequelae)
Route of Administration	Drug routes (e.g., Oral, IV, IM, SC, Topical, Inhalation)
Frequency	Dosing frequency (e.g., OD, BD, TDS, QID, Weekly, Monthly)
Causality	Causality assessment values (e.g., Certain, Probable, Possible, Unlikely, Inclassifiable)
Seriousness Criteria	ICH E2A serious criteria (e.g., Death, Life-Threatening, Hospitalization, Disability, Congenital Anomaly)
Severity Grade	Event severity (e.g., Mild, Moderate, Severe, Life-Threatening, Fatal)
Action Taken	Action taken with suspect product (e.g., Drug Withdrawn, Dose Reduced, Dose Increased, No Change)
Case Source	Case source types (e.g., Spontaneous, Clinical Trial, Literature, Post-Marketing, Regulatory Authority)

Product Master

Manage the list of pharmaceutical products. Each product has: Product Name, Generic Name, Strength, Dosage Form, Category, Is Active flag. Products appear in the Suspect Product Details dropdown.

Study Master & Sponsor Master

Study Master manages clinical study records (Study Code, Study Title, Phase, Status). Sponsor Master manages pharmaceutical company/sponsor information. These are used for clinical trial cases.

19. Admin – Checklist Management

InnoPV User Manual

Overview (Admin only)

Admin can configure checklists for each role and workflow stage. Checklists drive the quality gate at each workflow step. Navigate to Admin !> Checklists.

Creating a Checklist Master

- Step 1: Navigate to Admin !> Checklists !> Create Checklist.
- Step 2: Enter Checklist Name (e.g., "PV Associate Data Quality Checklist v2.0").
- Step 3: Select Applicable Role (PV Associate / PV Manager / Medical Reviewer).
- Step 4: Select Applicable Stage (stage where checklist is triggered).
- Step 5: Enter Version No (e.g., "1.0", "2.0").
- Step 6: Set Effective From date (when this checklist version becomes active).
- Step 7: Set Is Active = true to make it the current checklist for that role/stage.
- Step 8: Save the master, then add checklist items.

Adding Checklist Items

Item Text	The checklist question or criteria statement (e.g., "Is patient identifier present?")
Is Mandatory	If Yes, user CANNOT submit without checking this item
Display Order	Sequence number for ordering items in the checklist
Is Active	Whether this item appears in the checklist

Checklist Versioning Rules

Only ONE checklist should be active per Role + Stage combination. When creating a new version, deactivate the old one. Historical checklist responses are preserved with the checklist master version they were based on.

20. Profile & Password Management

InnoPV User Manual

View My Profile

Click on your name in the top navigation bar !' My Profile. View your: Full Name, Email, Mobile No, Designation, Department, Role.

Change Password

- Step 1: Navigate to My Profile !' Change Password.
- Step 2: Enter your Current Password.
- Step 3: Enter a New Password (must differ from current).
- Step 4: Confirm the New Password.
- Step 5: Click Change Password.
- Step 6: Password is updated immediately. You remain logged in.

Forced Password Change

If your account was newly created or password was reset by Admin, you will be automatically redirected to the Change Password screen on login. You cannot access any other page until you change your password.

Forgot Password (Self-Service)

- Step 1: On the login page, click "Forgot Password?"
- Step 2: Enter your registered email address.
- Step 3: A password reset link is sent to your email.
- Step 4: Click the link in the email (link is time-limited for security).
- Step 5: Enter and confirm your new password.
- Step 6: Login with the new password.

21. Case Status Flow Reference

InnoPV User Manual

Complete Status Flow

	Draft	Case saved but not yet processed
	DataEntryInProgress	Data entry ongoing (after valid intake)
	ValidityPending	Validity criteria under review
	InvalidFollowUpRequired	Case fails validity; follow-up needed
	DuplicateCheckPending	Awaiting duplicate check by PV Associate
	PvAssociateChecklistPending	PV Associate completing quality checklist
	SubmittedToPvManager	Case submitted to PV Manager inbox
	PvManagerReviewPending	PV Manager reviewing the case
	PvManagerChecklistPending	PV Manager completing quality checklist
	ReturnedByPvManager	Returned to PV Associate for corrections
	ResubmittedToPvManager	PV Associate resubmitted after corrections
	ForwardedToMedicalReviewer	Forwarded for medical review
	MedicalReviewPending	Medical Reviewer reviewing case
	MedicalReviewerChecklistPending	Medical Reviewer completing checklist
	ReturnedByMedicalReviewer	Returned to PV Manager for corrections
	AdditionalInformationRequired	More information requested
	MedicallyApproved	Case medically approved by Medical Reviewer
	CaseFinalized	Case finalized, ready for submission
	SubmissionPending	Regulatory submission pending
	Submitted	Submitted to regulatory authority
	AcknowledgementPending	Awaiting acknowledgement from authority
	CaseClosed	Case fully closed
	Reopened	Previously closed case reopened
	MarkedAsDuplicate	Case identified as duplicate of another
	MarkedAsInvalid	Case marked as invalid and archived
	OnHold	Case placed on hold
